

SMART Campus User Manual

Student Monitoring and Automated Reminder Tracker (SMART Campus)

1. Introduction

Welcome to **SMART Campus**, a web-based system designed to help schools efficiently manage attendance, grades, events, and automated notifications. This user manual serves as a guide for all system users, explaining features, access levels, and step-by-step instructions based on assigned roles.

SMART Campus supports paperless operations, improves communication, and ensures timely monitoring of student activities.

2. System Overview

SMART Campus is accessible through a web browser and supports multiple user roles with different levels of access and responsibility. All users must be invited and approved before gaining full access to the system.

Main system features include:

- User account management
- Attendance monitoring
- Grade reporting
- Event announcements
- Automated notifications
- Role-based access control

3. User Roles and Access Levels

3.1 Regular Student

Access Permissions:

- View school events
- View grades
- View notifications and reminders

- Time In and Time Out for attendance (only within the allowed time set by the system)

Limitations:

- Cannot create or edit attendance
- Cannot approve attendance records
- Cannot manage users or system settings

3.2 Regular Student + Classroom Secretary

This role has all the access of a Regular Student with additional responsibilities.

Additional Access Permissions:

- Create daily attendance as required by the school
- Approve or verify student attendance entries

Responsibilities:

- Ensure attendance is created on time
- Confirm student presence accurately

3.3 Teacher / Admin

Access Permissions:

- Invite users to register in the system
- Approve or reject student accounts
- Create and manage attendance
- Input and manage student grades
- Create and post school or class events
- Assign the role of **Classroom Secretary** to students

Responsibilities:

- Monitor student records

- Ensure accuracy of grades and attendance
- Manage classroom-level activities

3.4 School Super Admin

The Super Admin has the highest level of access and system control.

Access Permissions:

- All Teacher/Admin functions
- Assign and manage system roles (Admin, Secretary, Student)
- Full access to all system features and data
- System-wide permissions and oversight

Responsibilities:

- Overall system management
- User role assignment
- Data security and system integrity

4. Account Registration and Approval Process

4.1 Sign-Up

1. User accesses the SMART Campus website.
2. Click **Sign Up**.
3. Fill out the application form with accurate personal information.
4. Submit the application.

4.2 Waiting for Approval

- After registration, users are redirected to the **Waiting Page**.
- The account remains pending until approved by an Admin or Super Admin.

4.3 Approval Results

- **Approved:** User is redirected to the Profile Page and granted access based on assigned role.
- **Rejected:** User is redirected back to the Sign-Up Page and may reapply.

5. Logging In

1. Go to the SMART Campus login page.
2. Enter registered username and password.
3. Click **Log In**.
4. Successful login redirects the user to their dashboard.

6. Attendance Management

6.1 Student Time In / Time Out

- Students can only log attendance within the allowed time frame.
- Late or invalid attempts may be restricted by the system.

6.2 Secretary Attendance Creation

- Classroom Secretaries create daily attendance.
- Attendance entries must be reviewed and approved.

6.3 Teacher/Admin Attendance Control

- Teachers/Admins can create, edit, and manage attendance records.
- Attendance reports can be reviewed for accuracy.

7. Grades Management

- Teachers/Admins encode grades into the system.
- Students can only view their own grades.
- Grades are secured and cannot be edited by students.

8. Events and Notifications

8.1 Events

- Teachers/Admins create events such as exams, meetings, and school activities.
- Events are visible to students in the Events section.

8.2 Automated Notifications

- Notifications are automatically sent for:
 - Attendance reminders
 - Upcoming events
 - Grade updates

9. Profile and Theme Customization

- Users may update their profile information (subject to permission).
- Theme customization allows users to adjust visual preferences for better usability.

10. Security and Data Privacy

SMART Campus ensures:

- Secure login authentication
- Role-based access control
- Protection of personal and academic data

Users are advised not to share their login credentials.

11. Troubleshooting and Support

- Incorrect login credentials: Verify username and password.
- Account not approved: Contact your teacher or system admin.
- System issues: Report problems to the Admin or Super Admin.

12. Conclusion

SMART Campus is designed to simplify school activity management through an integrated, user-friendly, and secure system. By following this manual, users can maximize the system's features and contribute to efficient and organized school operations.

SMART Campus – Consolidated Troubleshooting Guide

Purpose of the Troubleshooting Guide

This document consolidates all troubleshooting procedures from the Instruction, Training, Service, Operation, and Organizational Policy Manuals of the SMART Campus system. It serves as a quick-reference guide for users and administrators to identify, diagnose, and resolve common system issues.

General User Issues (Students)

1.1 Login Problems

Possible Causes:

- Incorrect username or password
- Account not yet approved
- Internet connectivity issues

Solutions:

- Recheck login credentials
- Wait for admin approval or contact your teacher/admin
- Refresh the page or reconnect to the internet

1.2 Attendance Issues

Possible Causes:

- Attendance time window is closed
- Attendance not created by secretary or admin
- System delay

Solutions:

- Ensure Time In/Time Out is done within the allowed schedule
- Confirm that attendance for the day is created
- Refresh the page and retry

1.3 Missing Notifications or Events

Possible Causes:

- Event not yet posted
- Notification delay
- Browser cache issues

Solutions:

- Refresh the dashboard
- Check Events section manually
- Log out and log back in

Classroom Secretary Issues

1.1 Unable to Create Attendance

Possible Causes:

- Incorrect role assignment
- System permission not updated

Solutions:

- Verify assigned role with Admin
- Log out and log back in

1.2 Attendance Approval Errors

Possible Causes:

- Duplicate entries
- Student did not properly time in/out

Solutions:

- Review attendance logs carefully
- Coordinate with the teacher/admin for corrections

Teacher / Admin Issues

1.1 Missing Admin Features

Possible Causes:

- Incorrect role assignment
- Session not refreshed

Solutions:

- Confirm role with Super Admin
- Re-login to refresh permissions

1.2 Grade Encoding Errors

Possible Causes:

- Wrong student or subject selected
- Incomplete data entry

Solutions:

- Verify student and subject details
- Recheck entries before saving

System Administrator / Technical Issues

1.1 System Slowdown

Possible Causes:

- High system usage
- Server or database load

Solutions:

- Check system logs
- Monitor server performance
- Schedule maintenance if necessary

1.2 Data Inconsistency**Possible Causes:**

- Duplicate records
- Interrupted data submission

Solutions:

- Run data validation checks
- Restore data from the latest backup if needed

1.3 Unauthorized Access or Security Concerns**Possible Causes:**

- Compromised credentials
- Improper role assignment

Solutions:

- Reset affected user credentials
- Review access logs
- Reassign roles appropriately

Policy and Compliance Issues**1.1 Policy Violations**

Possible Causes:

- Misuse of system features
- Unauthorized data access

Solutions:

- Report incidents to Super Admin
- Conduct access review and apply sanctions if necessary

When to Escalate Issues

Issue Type	Escalation Point
Login and account issues	Teacher/Admin
Attendance and grade issues	Admin
Security and system failure	Super Admin / IT Personnel

8. Summary

This consolidated troubleshooting guide ensures faster problem resolution, reduces system downtime, and promotes smooth operation of the SMART Campus system across all user roles.
